MGC to Start Production and Sales of High-performance Glass Epoxy Copper Clad Laminates in China

Mitsubishi Gas Chemical Company, Inc. (MGC; Head Office: Chiyoda-ku, Tokyo; President: Kazuo Sakai) is commissioning Shengyi Technology Co., Ltd. (Shengyi; Head Office: Dongguan City, Guangdong, People's Republic of China; Chairman: Li Jin), to produce the core products of high-performance glass epoxy copper clad laminates (high-performance FR-4). The products produced by Shengyi will be distributed in China.

The MGC high-performance FR-4 uses an easily moldable heat-resistant resin suitable for high multilayer printed circuit boards to provide excellent electrical properties such as rapid electric transmission and very low signal losses during transmission. It has so far found use in communication infrastructure equipment, information equipment, and semiconductor test equipment.

The recent spread of portable devices and Internet access has led to a dramatic increase in the amount of information handled, making it necessary to process huge amounts of data at high speed. High-end information/communication equipment, such as routers, servers, and data storages, will be expected to provide increasingly rapid processing and higher capacity, further driving demand for the high-performance FR-4. With the market for printed circuit boards expanding more and more in China and other Asian countries, MGC finds it essential to establish a production site for the high-performance FR-4 in China. The company is, therefore, commissioning Shengyi to produce this high-tech material to further strengthen business in this area. Shengyi has been the distributor of the high-performance FR-4 in China.

<Overview of Shengyi Technology Co., Ltd.>

1. Address: No.5 Western Industry Road, North Industry District, Dongguan SSL SCI.&Tech Industry Park, Dongguan City, Guangdong, P.R. China.
2. Incorporation: June 27, 1985
3. Capital:1,095 million RMB(as of end of June,2011)
4. Net Sales:5,486 million RMB(2010 results)
5. Chairman: Li Jin
6. Operations: Manufacturing and selling the Prepreg and Copper Clad Laminates
7. Number of Employees:2785(as of end of December, 2010)
