

## Announcement of participation in CPhI Japan

~Presenting process development and production services for biopharmaceutical products~

 **MITSUBISHI GAS CHEMICAL COMPANY, INC.**

April 10, 2015

Mitsubishi Gas Chemical Company, Inc. (MGC; Head Office: Chiyoda-ku, Tokyo; President: Toshikiyo Kurai) is pleased to announce that we are going to participate in CPhI Japan held in Tokyo on April 22<sup>nd</sup> to 24<sup>th</sup>.

MGC has worked on R&D of Ubidecarenone (Coenzyme Q10), Hydrogen peroxide degrading enzyme (catalase) and Pyrroloquinoline quinone (PQQ) and other products by applying the previous studies on microbial. MGC applies its technologies cultivated through these R&D to mammalian cells cultures in order to provide contract process development and production services for biopharmaceutical products.

We can apply various techniques such as cellular breeding, cell culture, purification, scale-up and quality control. Moreover, we can contribute to technological development for high quality and safty treatment while providing contract development and production service for biopharmaceutical production including antibody medicine.

### ■Main exhibition content

- Contract process development and production services for biopharmaceutical products

### ■Features of service

- Contract service which cover all stages of biopharmaceuticals (from initial development to production process).
- Make heavy use of single-use equipment, utilizing facilities that enables flexible layouts.
- Provide sample productions within a short period of time and low cost.

CPhI Japan

Term : 22<sup>nd</sup> to 24<sup>th</sup> April, 2015

Venue : Tokyo Big Sight Exhibition Center - West Hall 1, 2 and Atrium Booth 1K-07

3-10-1 Ariake, Koto-ku, Tokyo 135-0063 Japan
