

Announcement of participating in China Coat 2015

~Presenting related products of curing agents for epoxy resins~

 MITSUBISHI GAS CHEMICAL COMPANY, INC.

November 9, 2015

Mitsubishi Gas Chemical Company, Inc. (MGC; Head Office: Chiyoda-ku, Tokyo; President: Toshikiyo Kurai) is pleased to announce that we will participate in China Coat 2015.

Our MXDA & 1,3-BAC have been widely used worldwide as raw material curing agents for epoxy resins. As epoxy resin curing agents, they show excellent properties such as chemical resistance, fast curing at low temperatures, clarity and UV resistance. In addition, MGC will showcase our ready to use epoxy hardener GASKAMINE series. GASKAMINE series shows excellent chemical resistance which can be applied to non-solvent-based and high-solid systems. MGC will introduce a new grade in the GASKAMINE series which has been developed and commercialized to target marine coating applications.

Please come by our booth to hear about our various products and suggested formulations. We look forward to meeting you and providing solutions to your business needs.

■Mainly displayed Products

- MXDA (<http://www.mgc.co.jp/eng/products/lm/07.html>)
- 1,3-BAC (<http://www.mgc.co.jp/eng/products/abc/07.html>)
- GASKAMINE series (<http://www.mgc.co.jp/eng/products/fghi/05.html>)
(<http://www.mgc.co.jp/eng/products/fghi/06.html>)
- MAXIVE[®] (<http://www.mgc.co.jp/eng/products/lm/pdf/maxive.pdf>)
- H-TMAAn (<http://www.mgc.co.jp/eng/products/abc/09.html>)
