Earnings per share (¥) .....	-	-	-	-

MGC has managed to work out rough schedules for the recovery of the production sites affected by the major earthquake that hit Eastern Japan in March 2011. At the present, however, the company can announce no forecasts on its performance in fiscal 2011 because it still requires time to accurately calculate the impact of the difficulties faced by the above sites in their operation. Forecasts will be announced as soon as they are available.

#### 4. Other Information

##### 1) Transfer of important subsidiaries during the period: None

(Transfers of certain subsidiaries resulting in changes in the scope of consolidation)

##### 2) Changes in accounting methods, procedures and presentation in the preparation of these financial statements

1. Changes following revisions to accounting standards: Yes
2. Other changes: None

##### 3) Number of shares outstanding (ordinary shares)

	FY 2010	FY 2009
Number of shares outstanding at end of the fiscal year (including treasury shares) .....	483,478,398	483,478,398
Number of treasury shares at end of the fiscal year .....	31,471,354	31,446,964
Average shares outstanding during the fiscal year .....	452,023,503	452,044,572

2. Forecasts, etc., recorded in this document contain forward-looking statements that are based on management's estimates, assumptions and projections at the time of publication. A number of factors could cause actual results to differ materially from expectations.

## 1. Consolidated Operating Results

Note: Comparisons in the following section of the report are with the previous fiscal year, unless stated otherwise.

### (1) Consolidated Operating Results

#### ① Results for this period

During fiscal 2010, the Japanese economy continued to show signs of recovery. In the second half of the year, however, recovery paused due to appreciation of the yen against the dollar. The major earthquake that struck off the coast of Eastern Japan on March 11, 2011 had a serious impact on the economy.

The MGC Group's overseas businesses in general, including exports, were affected by the strong yen, and demand for some products for semiconductors and LCDs declined in the second half of the year. However, higher sales volumes for most products and improvement in the market for chemicals pushed up both revenue and earnings.

The March 11 earthquake affected buildings and equipment at the MGC Kashima Plant and MGC electronic materials production subsidiary Electrotechno Co., Ltd. An extraordinary loss of ¥3.0 billion due to the natural disaster was, therefore, included in the financial statements. Operating results were not very seriously affected.

Against this business backdrop, the MGC Group implemented various measures in accordance with the basic policy stated in its medium-term management plan, "MGC Will 2011," while at the same time making efforts to increase sales volume and maintain margins at acceptable levels.

After the major earthquake and tsunami, the company made all-out efforts to restore the affected sites as quickly as possible.

In fiscal 2010, the MGC Group achieved ¥451.0 billion in consolidated net sales, an increase of ¥66.5 billion (17.3%) from the previous year. Consolidated operating income was ¥23.3 billion, an increase of ¥19.2 billion (471.2%). Consolidated ordinary income rose by as much as ¥29.0 billion (394.1%) to ¥36.3 billion. The net income of ¥18.9 billion, an increase of ¥13.1 billion (225.2%) from the previous year, includes extraordinary losses of ¥13.9 billion, which in turn include losses on the appraisal of investments in securities as well as losses due to the natural disaster and the application of the Accounting Standard for Asset Retirement Obligations.

On the non-consolidated basis, MGC posted ¥340.0 billion in net sales, an increase of ¥61.0 billion (21.9%) from the previous year. Operating income was ¥6.9 billion, an increase of ¥14.2 billion, and ordinary income grew by a substantial ¥14.0 billion to ¥14.3 billion.

Non-consolidated net income grew by ¥0.1 billion (3.2%) from the previous year to ¥4.7 billion.

### Results by business segment

#### **Natural Gas Chemicals Company**

The methanol business enjoyed an increase in net sales thanks to growing sales volumes, as demand in the fuel market and other markets in China drove world demand to increase prices, and the new plants in Brunei and Venezuela started operation.

Methanol and ammonia derivatives marked improvements both in net sales and earnings because strong demand in Asian countries caused an upward trend in the markets for MMA and neopentylglycol.

Despite a reduction in fixed cost, the enzyme and coenzyme business suffered from low earnings, as sales of coenzyme Q10 remained sluggish.

Crude oil and other energy increased in earnings due to an increase in the sales price of crude oil.

In fiscal 2010, the Natural Gas Chemicals Company achieved consolidated net sales of ¥145.5 billion, an increase of ¥35.0 billion (31.7%) from the previous year and an operating income of

¥1.3 billion, a year-on-year increase of ¥7.2 billion. Due to improvement in the performance of overseas methanol producing companies, equity in earnings of affiliates of ¥11.7 billion was posted, resulting in a consolidated ordinary income of ¥11.5 billion, a year-on-year increase of ¥13.8 billion.

### **Aromatic Chemicals Company**

Specialty aromatic chemical products improved both in terms of net sales and earnings, due to the strong performance of meta-xylenediamine for epoxy resin curing agents, Nylon-MXD6 for gas barriers in PET bottles and engineering plastics, and aromatic aldehydes for resin additives in Europe and the USA.

Purified isophthalic acid enjoyed growing demand mainly in PET bottle applications in China and other Asian markets, resulting in higher prices in the fourth quarter. However, profitability did not fully recover due to the strong yen against the dollar.

In fiscal 2010, Aromatic Chemicals Company achieved consolidated net sales of ¥111.1 billion, an increase of ¥16.7 billion (17.7%), an operating income of ¥0.2 billion, an increase of ¥6.1 billion, and an ordinary loss of ¥0.7 billion, an improvement of ¥7.4 billion from the previous year.

### **Specialty Chemicals Company**

The inorganic chemicals business improved both in terms of revenue and earnings due to higher sales volumes for hydrogen peroxide as a discoloring agent for pulp/paper and as an industrial oxidizing agent.

The electronic chemicals business, including overseas subsidiaries, grew both in terms of revenue and earnings, as sales volumes of products for both semiconductors and LCD applications increased.

In engineering plastics, polycarbonates suffered a loss in earnings due to a decline in sales volume and increases in raw material prices. By contrast, sales of polyacetal were driven by strong demand in Asia, surpassing the prior-year levels.

Due to the major earthquake in March, the Kashima Plant, a key MGC production site, suspended operation. The negative contributions to business results will be included in the financial statements for fiscal 2011.

Polycarbonate sheets and films achieved higher revenue and earnings with increases in the sales volumes of sheets for exclusive sunglasses and cellular phones, although the average unit sales prices of films used in flat panel displays declined.

In fiscal 2010, the Specialty Chemicals Company posted consolidated net sales of ¥134.0 billion, an increase of ¥15.7 billion (13.3%) from the previous year and an operating income of ¥15.1 billion, a year-on-year increase of ¥3.6 billion (32.0%). Due to a ¥3.0 billion equity in earnings of affiliates, ordinary income reached ¥17.1 billion, an increase of ¥4.6 billion (37.3%).

### **Information & Advanced Materials Company**

BT materials for semiconductor packaging showed good performance in the beginning of the fiscal year due to strong demand for applications for mobile phones and digital consumer electronics. But they slowed down in the late second quarter due to stock adjustments by customers. For the full year, however, an increase in earnings was achieved thanks to cost reduction effects. On the other hand, the sales volume remained at the same level as the previous year, partly because Electrotechno suspended production temporarily following the major earthquake in March.

Despite being affected by the summer heat in the core market for domestic food, oxygen

absorbers such as AGELESS<sup>®</sup> achieved year-on-year growth in earnings thanks to the spread of individual food packaging and successful sales of products for other applications.

In fiscal 2010, the Information & Advanced Materials Company achieved consolidated net sales of ¥59.5 billion, a decline of ¥ 0.8 billion (1.4%), an operating income of ¥7.7 billion, a year-on-year increase of ¥1.5 billion (25.6%), and an ordinary income of ¥7.5 billion, an increase of ¥1.9 billion (35.7%).

## **Other**

In the year ended March 31, 2011, the other business segment achieved consolidated net sales of ¥0.7 billion, a year-on-year decline of ¥0.1 billion (11.7%). Operating income fell by ¥0.1 billion (38.8%) to ¥0.2 billion, and ordinary income increased by ¥0.7 billion (44.8%) to ¥2.3 billion.

## **② Consolidated forecasts for the fiscal year 2011**

The world economy is expected to recover as a whole. However, Japan will face economic difficulties due to the suspension of production and limited power supplies caused by the major earthquake in March.

In the MGC Group, the March 11 earthquake affected the Kashima Plant and Electrotechno Co., Ltd., key production sites for specialty chemicals and information/advanced materials. Both locations were forced to suspend production. In early May, Electrotechno is expected to recover production to the level at which it operated before the earthquake. The Kashima Plant will not be able to resume normal operation until late June. MGC has managed to work out rough schedules for the recovery of the production sites. At the present, however, the company can announce no forecasts on its performance because it still requires time to accurately calculate the impact of the difficulties faced by the above sites in their operations.

MGC will announce its forecasts as soon as they are available.

## **(2) Consolidated financial position**

### **① Assets, liabilities and net assets**

As of March 31, 2011, total consolidated assets were ¥577.0 billion, ¥37.6 billion higher than at the end of the previous fiscal year.

Current assets increased by ¥26.4 billion to ¥244.5 billion, primarily due to an increase in trade notes and accounts receivable associated with a recovery of sales.

Fixed assets increased by ¥11.1 billion to ¥332.5 billion, primarily due to an increase in lease assets.

Total liabilities increased by ¥27.4 billion to ¥288.7 billion. Current liabilities rose by ¥22.2 billion. Contributions include a decline due to ¥4.1 billion in repayment of short-term borrowings, a ¥20.0 billion current portion of corporate bonds transferred from non-current liabilities, a ¥3.6 billion increase in trade notes and accounts payable. Non-current liabilities increased by ¥5.2 billion: While ¥20.0 billion in corporate bonds was transferred to current liabilities, there were increases in lease liabilities, long-term borrowings, and other such factors.

Net assets increased by ¥10.1 billion to ¥288.2 billion. Valuation gains on other investment securities and a net income of ¥18.9 billion more than offset the decrease from foreign currency translation adjustments.

As of March 31, 2011, the shareholders' equity ratio was 48.2% (March 31, 2010: 49.9%). Net assets per share at the end of the period were ¥615.25, compared to ¥595.56 one year earlier.

## **② Consolidated cash flows**

In line with *MGC Will 2011*, MGC Group's current medium-term management plan, MGC is emphasizing the allocation of resources to leverage the different characteristics and technical strengths within each business in everything from basic chemicals through to high-performance materials, and strengthening and expanding its core businesses to expand earnings. In order to construct and maintain a sound financial condition, MGC is working to create free cash flow, taking steps such as disposing of unutilized assets and optimizing inventories.

As of March 31, 2011, total cash and cash equivalents were ¥46.7 billion, ¥10.7 billion higher than at the end of the previous fiscal year.

### **1) Operating activity cash flow**

Net cash provided by operating activities increased by ¥8.4 billion from the previous year to ¥39.7 billion. The primary contribution came from a ¥16.4 billion increase in net income before income taxes to ¥23.9 billion.

### **2) Investing activity cash flow**

Net cash outflow from investing activities was ¥24.6 billion, ¥9.0 billion less than the outflow for the previous year. This was primarily because outflow due to the acquisition of fixed assets fell by ¥5.7 billion from the previous year to ¥25.9 billion.

### **3) Financing activity cash flow**

Net cash outflow from financing activity was ¥1.8 billion, a decline of ¥13.5 billion from the previous year. This was because borrowings increased in fiscal 2010, following a decline in the previous year.

## **(3) Dividend policy, payments and forecasts**

For the year under review, MGC plans to pay a year-end dividend of ¥4.0 per share, as previously forecast. In combination with the interim dividend of ¥4.0 per share already paid, this represents an annual dividend of ¥8.0 per share and a consolidated payout ratio of 19.1%.

MGC has yet to announce its forecasts for fiscal 2011. However, it follows its dividend policy and plans to pay the same dividends per share as for the current fiscal year: ¥4.0 interim and ¥4.0 year-end.

## **2. Management policy**

### **(1) Basic management approach**

Based on the MGC Group management philosophy of developing in harmony with society through using chemistry to create diverse value, MGC aims to realize CSR in all its activities while developing and growing sustainably on a global stage as a highly differentiated, widely recognized chemicals group operating from a strong platform of proprietary technology.

### **(2) Medium-term management indices and targets**

MGC decided that, in order to follow a path of further sustainable growth it was necessary to formulate and implement a plan from a long-term perspective. Consideration was first given to determining what kind of company MGC should aim to become by 2021, the 50<sup>th</sup> anniversary of its establishment. As the first step in achieving this objective, MGC formulated *MGC Will 2011*, its medium-term management plan to fiscal 2011 (the fiscal year ending March 31, 2012) and began implementing the plan in April 2009.

The main policies and quantitative targets in the plan are outlined below.

#### **● The MGC Group of 2021**

- Trusted by society and realizing CSR in all corporate activities
- Sales exceeding ¥1 trillion, and in the global Top 30 chemical companies
- Highly profitable and research driven, achieving *global excellence*

● **Basic strategies of MGC Will 2011**

1. Strengthen and expand core businesses
2. Accelerate new product development and commercialization
3. Improve total enterprise quality in support of sustainable growth

**Quantitative targets**

Consolidated financial indices	FY 2011 ending March 2012
Net sales	¥550.0 bn
Operating income	¥40.0 bn
Ordinary income	¥50.0 bn
ROA (ordinary income/total assets)	9.0%
Debt-equity ratio	Below 0.6

**(3) Key issues**

In implementing its business strategies, the MGC Group policy is to intensively funnel its business resources into product groups with competitive advantage for further strengthening and expansion.

Key challenges in creating new products and developing their markets include making good use of the MGC “technology platform” developed under the previous medium-term management plan, adapting the diverse technology owned by the Group to functional needs from the market, and creating synergy among group companies and divisions.

MGC will pursue sustainable growth through steps to further improve management quality. Important management issues identified in the policy include achieving zero accidents or disasters, actively contributing to the reduction of environmental impact, recruiting and development of human resources, reducing costs, improving productivity, fine-tuning existing technologies, constructing a more robust financial foundation, and enhancing global group management.

In the fiscal year ending March 31, 2012, the final year of the “MGC Will 2011” medium-term management plan, the MGC Group will face economic uncertainty due to many reasons. These include the impact of the major earthquake that hit Eastern Japan in March 2011, high raw material costs, and exchange effects. Amid this adversity, MGC will continue to implement rigorous cost-cutting and price revision measures, while at the same time continually improving and strengthening its business structure.

Increase (decrease) in cash and cash equivalents resulting from change of scope of consolidation.....	1,119	469
<b>Cash and cash equivalents at end of period</b> .....	<b>36,048</b>	<b>46,768</b>

(5) Segment information

**1. Segment overview**

Mitsubishi Gas Chemical employs an in-house company system, which was adopted to clarify the responsibilities of each business and improve efficiency. Each company conducts its business according to an independent strategy formulated around its products and services. This structure makes it possible obtain separate financial information for each segment, and in order to optimize the allocation of management resources and assessment of performance by the Board of Directors, the four companies, the Natural Gas Chemicals Company, the Aromatic Chemicals Company, the Specialty Chemicals Company and the Information & Advanced Materials Company, are used as segments for the presentation of financial information.

The Natural Gas Chemicals Company manufactures and sells products such as methanol, ammonia, amines, methacrylate derivatives, polyhydric alcohol, enzymes, coenzymes and crude oil.

The Aromatic Chemicals Company manufactures and sells xylene isomers and their derivatives.

The Specialty Chemicals Company manufactures and sells products such as hydrogen peroxide and other inorganic chemicals for industrial use, electronic chemicals, and engineering plastics.

The Information & Advanced Materials Company manufactures and sells products such as materials for printed circuit boards, printed circuit boards, and oxygen absorber such as AGELESS®.
