## 1. Consolidated business results for this period

*Note: All comparisons are with the first quarter of the previous fiscal year, unless stated otherwise.*

### (1) Consolidated operating results

#### Overview of results

During the first six months of the fiscal year ending March 2012 (April 1-September 30, 2011), the Japanese economy continued to face difficulties due to the aftereffects of the major earthquake that occurred in March and the continuing appreciation of the yen against other currencies. In spite of this adversity, the economy showed signs of recovery thanks to the recovery of supply chains. After the middle of the year, however, rapidly increasing uncertainty in foreign economies caused Japan's economic environment to deteriorate even further.

Following damage sustained in the March 11 earthquake, the MGC Kashima Plant and the MGC electronic materials production subsidiary Electrotechno Co., Ltd. were restored to normal operation earlier than initially scheduled. Apart from the direct and indirect impact of the natural disaster and the strong yen, sales of some products for LCD displays fell, causing a decline in operating income.

On the other hand, high market prices for methanol led to an increase in equity in earnings for overseas methanol producing companies and other affiliates.

Despite an extraordinary loss of ¥2.6 billion, including losses on valuation of investment securities, extraordinary gain or loss improved by ¥6.8 billion from the corresponding period of the previous year.

In the six-month period under review, the MGC Group achieved consolidated net sales of ¥230.0 billion, an increase of ¥3.0 billion (1.3%) from the prior-year period, a consolidated operating income of ¥7.5 billion, a decline of ¥5.1 billion (40.6%), equity in earnings of affiliates of ¥10.4 billion, an increase of ¥2.6 billion (34.2%), a consolidated ordinary income of ¥16.2 billion, a drop of ¥1.0 billion (6.2%). Net income increased ¥5.7 billion (89.4%) to ¥12.1 billion.

#### Results by business segment

##### **Natural Gas Chemicals Company**

The methanol business enjoyed an increase in net sales thanks to high market prices due to steady world demand—most notably in the Chinese market—and energy prices that remained at high levels.

Methanol and ammonia derivatives achieved the same level of earnings as in the prior-year period. Ammonia and MMA-based products achieved higher revenue and earnings thanks to increasing market prices, while neopentylglycol became less profitable.

The enzyme and coenzyme business posted lower revenue and earnings compared with the prior-year period as sales of coenzyme Q10 remained sluggish.

Crude oil and other energy marked higher earnings thanks to increasing crude oil sales prices.

In the six-month period under review, the Natural Gas Chemicals Company achieved net sales of ¥74.1 billion, an increase of ¥3.7 billion (5.4%) and an operating income of ¥0.4 billion, an improvement of ¥0.9 billion. Due to the improvement in the earnings of overseas methanol producing companies, equity in earnings of affiliates reached ¥8.3 billion, resulting in an ordinary income of ¥8.1 billion, an increase of ¥4.4 billion (118.4%).

### **Aromatic Chemicals Company**

Specialty aromatic chemicals were as successful as in the prior-year period. Aromatic aldehydes achieved gains in both revenue and earnings thanks to strong demand for uses in resin additives. Negative factors included the lower profitability of meta-xylenediamine due to increasing raw material prices and the continuing appreciation of the yen against other currencies.

The purified isophthalic acid business recorded improvements in both net sales and earnings. In addition to a decline in the sales volume due to a slowdown in demand in China, it was affected by the strong yen and increasing raw material prices. These negative factors were more than offset by higher sales prices.

In the first and second quarters of fiscal 2011, the Aromatic Chemicals Company achieved net sales of ¥67.5 billion, an increase of ¥12.6 billion (23.0%), an operating income of ¥0.7 billion, an improvement of ¥0.4 billion (147.0%), and an ordinary income of ¥0.1 billion, an improvement of ¥0.5 billion.

### **Specialty Chemicals Company**

The inorganic chemicals business suffered losses in both revenue and earnings due to a reduction in hydrogen peroxide sales volume caused by suspended production at the Kashima Plant.

The electronic chemicals business achieved increases in both revenue and earnings. A reduction in the domestic sales volume of super-pure hydrogen peroxide was more than offset by strong demand for hybrid chemicals for semiconductors and LCD displays and the successful performance of overseas subsidiaries.

In engineering plastics, polycarbonates suffered losses in both revenue and earnings due to lower sales volumes (caused by suspended production at the Kashima Plant and weaker domestic demand) and increases in raw material prices. By contrast, polyacetal was largely successful in overseas markets, surpassing its performance for the prior-year period.

Polycarbonate sheets and films posted lower revenue and earnings, because, despite the success of hard-coated sheets for cellular phones and other products, net sales of films used in flat panel displays fell sharply.

In the first six-month period of fiscal 2011, the Specialty Chemicals Company posted net sales of ¥59.7 billion, a decline of ¥9.9 billion (14.3%) and an operating income of ¥3.7 billion, a drop of ¥4.8 billion (56.3%). Due to ¥0.9 billion equity in earnings of affiliates, ordinary income fell ¥4.4 billion (50.1%) to ¥4.4 billion.

### **Information & Advanced Materials Company**

BT materials for semiconductor packaging suffered losses in both revenue and earnings. Immediately after achieving early recovery of Electrotechno, these materials enjoyed high levels of incoming orders, mainly for applications in mobile electronic devices. In July and after, however, sales volume declined due to inventory adjustments by many customers and sluggish actual demand. Another negative factor was an increase in manufacturing costs, which resulted in lower profitability.

Thanks to strong performance, mainly in the core market for domestic food, oxygen absorbers such as AGELESS<sup>®</sup> surpassed revenue and earnings for the prior-year period.

In the six-month period under review, the Information & Advanced Materials Company posted net sales of ¥28.2 billion, a decline of ¥3.4 billion (10.8%), an operating income of ¥3.4 billion, a drop of ¥1.5 billion (31.5%), and an ordinary income of ¥3.3 billion, a drop of ¥1.5 billion (32.0%).

## Other

Up to the second quarter of fiscal 2011, other business operations achieved net sales of ¥0.3 billion, an increase of ¥0.0 billion (3.3%) and an operating income of ¥0.2 billion, an increase of ¥0.0 billion (32.5%), and an ordinary income of ¥0.9 billion, an increase of ¥0.0 billion (1.8%).

## (2) Consolidated financial position

Total consolidated assets as of September 30, 2011 were ¥576.1 billion, ¥0.9 billion lower than at the end of the previous fiscal year. This was because cash fell, while tangible fixed assets and merchandise/finished products increased. Liabilities declined ¥9.4 billion to ¥279.3 billion, primarily due to the complete repayment of the current portion of corporate bonds, despite increases in short-term borrowings and trade notes and accounts payable. Net assets grew to ¥296.8 billion, an increase of ¥8.5 billion, primarily due to an increase in retained earnings.

## (3) Consolidated forecasts for the fiscal year ending March 31, 2012

Since the last announcement of financial performance forecasts, the world economy has rapidly deteriorated, causing reductions in both domestic and overseas demand. The continuing appreciation of the yen and rising raw material prices have reduced chemical product margins, while polycarbonate and BT material sales volumes have been declining. Despite the expected increase in equity in earnings of overseas methanol producing companies, full-year financial results will be lower than the previously forecast figures.

These forecasts assume exchange rates of ¥80=\$1 and ¥110=€1.
